Account Management Policy

1. Purpose

This document describes procedures for managing employee accounts.

2. Account Creation

New employee accounts are created after the required employee information and access approvals have been received.

3. Account Activation

Employees must complete the required identity verification before accessing organizational systems.

4. Access Requests

Access to restricted applications requires approval from the appropriate manager or system owner.

5. Account Locking

Accounts may be temporarily locked when suspicious activity or repeated unsuccessful authentication attempts are detected.

6. Account Deactivation

Employee accounts should be deactivated when access is no longer required.
