VPN Support Guide

1. Purpose

This document provides guidance for connecting to the organization's VPN.

2. VPN Installation

Install the organization-approved VPN client on the assigned device.

3. VPN Login

Open the VPN client, enter the organization credentials, complete any required verification, and select Connect.

4. Connection Problems

If the VPN does not connect, verify the internet connection, restart the VPN client, and try again.

5. Authentication Problems

Employees should verify that their credentials are current and that required multi-factor authentication is completed.

6. Escalation

If troubleshooting does not resolve the problem, contact the IT support team.
