Customer Complaint Handling Procedure

1. Purpose

This document defines the process for receiving and resolving customer complaints.

2. Complaint Registration

Every customer complaint should be recorded in the support system with the relevant customer and issue details.

3. Complaint Classification

Complaints should be classified according to the type and severity of the issue.

4. Initial Response

The support team should acknowledge the complaint and communicate the next steps to the customer.

5. Escalation

Complaints requiring specialist review should be escalated to the appropriate team.

6. Resolution

The final resolution and actions taken should be documented before the complaint is closed.
